

Croatian National Bank Finds Security With FileCloud

case study

Locked Down Security

Croatian National Bank (HNB), founded in December 1990, is the central bank for the Republic of Croatia. Its main responsibilities include maintaining the stability of the national currency, the kuna, and ensuring general financial liquidity within the country. HNB also issues banknotes and holds the national monetary reserves. In performing its duties HNB acts as an independent institution responsible to the Parliament.

With significant business partners across Croatia and the world, HNB has massive amounts of documents, files, contracts and more that must be both readily available and vault secure. With the financial stability of the nation at stake, there is no room for error and no excuse or anything but the most secure file sharing available.

Ensuring that employees, business partners and parliament have access to the right files (and only the right files) helps HNB serve the country with integrity.

How does HNB manage all of these massive files with vault-like security? With FileCloud.

Confidential Data and File Sharing

As the national bank for Croatia, HNB has interests and partners across the country, Europe and the world. With so many customers and so many files, it is vital that HNB is able to readily share important files in the safest of ways. Files must be readily available but highly secure. To make sure this is the case, HNB must ensure that any file sharing partner is able to provide both a highly secure and highly customizable file sharing solution. Efficiently sharing vital documents across the globe was becoming difficult with the dated systems that were in place. HNB needed to get back to the cutting edge of technology and security.

File security and efficient file sharing across a large number of customers, combined with regulator and parliamentary requirements, meant that a robust and secure file sharing system with tight security and customizable permission levels was important for continued operations.

What HNB needed was a file sharing system that was first and foremost highly secure, but also easy to use and capable of handling large volumes of files every day. HNB could not afford file sharing delays due to technical and security limitations of their old system. HNB's focus on the country's financial interests required that they remain on top of their file sharing and security game.

What they needed was to find a new solution that could deliver on the volume and security support. With its high security, customizable permissions and ability to move large volumes of files, FileCloud was the clear leader.

HNB Requirements: Security and Volume

It was clear to HNB that they needed to find a new file sharing solution. They needed something that was robust but easy to use.

They were looking for a solution that provided:

Support for large file volume

Hyper-secure data storage and sharing

Easy permission settings to cover different partners

Locking it Down with FileCloud

HNB was on the market for a file sharing solution that would live up to expectations and meet their high security needs. HNB explored the market and tested out a couple of the big names in the industry. What they found were insecure systems, lack of customization and high costs.

After putting FileCloud through rigorous testing using the 14 day free trial, HNB confidently made their decision. Ultimately HNB chose FileCloud because of the possibility of server synchronization (to better process large volumes of files), free limited users and a very high level of security.

Once the decision was made, the transition to FileCloud was quick and easy. With FileCloud's best in class customer support, HNB had their new, hyper-secure file sharing system up and running, leaving HNB free to focus on the financial wellbeing of the people of Croatia.

Try FileCloud Now

FileCloud's extensive functionality, ease of use, affordability, and world-class support make it the solution for file share, sync, and mobile access already adopted by enterprises and organizations around the world.

You too can benefit from FileCloud and its industry-leading quality and performance today!

Contact us at FileCloud now and take advantage of our [free 14-day trial](#) to see what FileCloud can do for your business.

Summary

To compete in today's fast-paced market, companies need to get business done without being slowed down by IT challenges. We understand this. FileCloud's software is a solution focused on enterprise file sharing that is just as helpful to business practices as it is to IT requirements.

- Integration with existing resources helps lower business operating costs
- Extensive feature-set and ease of use helps increase user productivity
- Support for an ever-increasing reliance on a mobile workforce keeps you competitive.

FileCloud offers an Enterprise File Sharing and Sync (EFSS) solution that enables you to realize the benefits of collaboration and productivity with the security you require to protect your Intellectual Property anywhere it goes in the course of doing business.
