

UI Messages

FileCloud generates a number of messages for user actions. FileCloud comes with default messages and these can be customized.

The following messages can be changed

Message Type	Description
404 Error	This is the HTML response shown to user in browser when URL requesting invalid received by FileCloud
Email Subscribe Failure	This is the error if a user email could not be subscribed for notifications
Email Subscribe Success	This is the message that will be displayed when user email is subscribed successfully
Email Unsubscribe Failure	This is the error displayed when user email unsubscribe fails.
Email Unsubscribe Success	This is the message shown when an user email is unsubscribed
Account Verification Failure	This is the error shown when a user email verification fails
Account Verification Success	This is the message shown when a user email verification succeeds
Generic Message	This is a message used for all other messages shown via the web browser UI
Login Error Message	This is a HTML message that will be display on user login failures. This message can be used to show different URLs to users for further help with login (for example, reset an expired AD password).

1. Log into Administration Portal
2. Click on "Customization" on the left navigation panel
3. Click on "UI Messages" tab
4. Change the entries as needed.
5. Click on **save** button

The screenshot shows the FileCloud Administration Portal interface. The left sidebar contains navigation options: HOME (Dashboard), USERS/GROUPS (Users, Groups, Admins), MANAGE (Network Folders, User Shares, Folder Permissions), DEVICES (Devices), and MISC. (Devices). The main content area is titled "Manage User UI Customizations" and has several tabs: General, Labels And Logos, URL, **UI Messages**, Email Templates, News Feed, TOS, and Advanced. Under the "UI Messages" tab, there is a section for "Custom UI Messages" with a "Reset to defaults" button. Two messages are listed:

- 404 Error**: The text area contains the following HTML code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8" />
  <title>FileCloud Page Not Found</title>
```
- Email Subscribe Failure**: The text area contains the following HTML code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8" />
  <title>Failed to Subscribe your email address</title>
```

At the bottom right of the "Custom UI Messages" section, there is a "Save" button.
