

# Installing FileCloud Server

Use the following outline to understand how the installation process works.

 Make sure to read the [Requirements](#) and [Storage and Client Application Limits](#) first.

## Step 1: Install FileCloud Software

- **WINDOWS:** [Install FileCloud using the installer on Windows](#) (Windows 64 bit) (or)
- **LINUX (Debian/Ubuntu, CentOS/RedHat):** Install FileCloud using the [easy Installation script](#) (Recommended Option)
  
- Other options
  - [Install FileCloud using the provided Virtual Machine](#) (VMWare / VirtualBox etc)
  - Manual install from scratch on [Debian/Ubuntu](#) or [CentOS/RedHat/Fedora](#)
  - [Install FileCloud on Amazon AWS](#)
  - [Install FileCloud on Amazon GovCloud AWS](#)
  - Install FileCloud on Linux offline - [click here to download the tool](#).

After installation, if Apache will not start, see [FileCloud not starting on Windows](#).

## Step 2: Verify the FileCloud Installation

- Open the FileCloud Install page at <http://<site>/install> (typically <http://127.0.0.1/install>) and go through the **BASIC** and **EXTENDED** checks. *Note that some checks might fail, but you can resolve them later in the Admin Portal Settings.*

[Go to Verify Your Installation](#)

## Step 3: Log in to the Admin Portal

- Open the FileCloud Admin website at <http://<site>/ui/admin/index.html>
- Admin Username is **admin**, Admin Password is **password**

[Go to Extended Checks, Step 6](#)

## Step 4: Install Your License

Your FileCloud license is a document that provides legally binding guidelines on the use and distribution of your newly installed FileCloud software.

[Go to Install the FileCloud License](#)

## Step 5: Set the Managed Storage Path

Set the storage path where FileCloud stores its all its files. This only applies if you are using Local Storage.

If you are going to use OpenStack or Amazon S3, then you don't need to set this path.

[Go to Configure the Managed Storage Path](#)

## Step 6: Proceed to Site Setup

Use the Administrator Guide to get your site ready for users to log onto and use.

[Go to the Administrator Guide](#)

Are you migrating to FileCloud?

No matter which edition of FileCloud you are using, it is easy to transfer your data after your FileCloud site is setup.
