

Share Settings

The Attach Share Password by Default for Public Shares setting is available beginning in FileCloud 20.1.

File sharing allows users to provide public or private access to files stored in FileCloud Server with various levels of access privileges.

To control how users share files and folders in ways that are appropriate for your organization, administrators configure share settings.

- [Configure Sharing Defaults](#)
- [Set the Global Share Mode](#)
- [Specify Sharing Expiration](#)
- [Secure Shares](#)
 - [User Account Search Mode](#)
 - [User Account-Type Search Mode](#)
