<p>19.1</p>	<p>April 5, 2019</p>	<p>CodeLathe customers get a huge boost in supporting financial regulations with FileCloud's new Governance features. The management dashboard and retention policy features have been designed to help regulators manage all digital content for legal, regulatory, compliance, and internal requirements. FileCloud allows regulators to manage content effectively - that means seeing what is occurring in a large installation with thousands of users on a day-to-day basis. CodeLathe knows that governance is also evolving, and as requirements change, our software is flexible enough to handle the new requirements.</p> <p>In addition to new features, FileCloud users will also notice how much faster FileCloud responds to your requests. This is due to improvements in background processing, allowing FileCloud to work more quickly when you are sharing files and storing data. Many other improvements have been completed to provide users with an even richer experience, especially to the Sync and Drive clients that synchronize data with FileCloud.</p>

<p>18.2</p>	<p>September 27, 2018</p>	<p>To help FileCloud administrators protect their systems, this update includes new antivirus integration. More tools have also been added to this update to help you manage your FileCloud deployment, such as better error reporting, more control over notifications, and better monitoring of MongoDB clusters.</p> <p>For the FileCloud user, this updates makes it easier than ever before to integrate FileCloud with your business needs. The new DocIQ assistant integrates directly into Microsoft applications, the FileCloud Drive and Sync clients now provide the same functionality as the User Portal, and you can now access FileCloud options directly in Sales Force. In addition to direct integration, this update also provides support for more file types, such as viewing medical files, and previewing more types of Adobe files.</p> <p>Customers are CodeLathe's #1 priority, so this update includes a substantial amount of customer requests and bug fixes to ensure FileCloud performs reliably and efficiently for you.</p>
<p>18.1.0.682</p>	<p>May 7, 2018</p>	<p>This update includes many new features including comprehensive metadata and tagging support, mobile app enhancements, performance improvements and advanced search in desktop apps.</p>
