

# How to install Transmission - torrent client

---

Users who want to use Transmission on their TonidoPlug2 can follow these instructions:

1) Update the apt-get library

```
# apt-get update
```

2) Install Transmission packages.

```
# apt-get install transmission-cli transmission-common transmission-daemon
```

3) Restart Transmission services.

```
# /etc/init.d/transmission-daemon stop  
# /etc/init.d/transmission-daemon start
```

4) Once transmission is restarted, you can connect to the web UI with the URL : [http://<your\\_tp2\\_ip>:9091/transmission/web/](http://<your_tp2_ip>:9091/transmission/web/)
