

Formatting wiki content

You can format the text you enter into the wiki editor using Markdown, a simple formatting language that lets you enhance plain text with styling such as italics, bold print, bullets and indents.

In the following example, the wiki editor includes a list of services preceded by asterisks. In the preview panel the asterisks appeared as bullets, which is how they appear in the actual wiki. You can also use the shortcuts in the text editor's menu bar to insert Markdown.

 When you make changes in the Wiki editor, click **Publish** to save your changes before closing.

The following table shows Markdown symbols and the effect they have when the text is formatted in the wiki:

Markdown feature	In text editor	In wiki
Bullets Asterisk followed by a space in front of a line is formatted as a bullet. For each level of bullets, indent 5 spaces.	 <pre>B I 🔗 H ☰ ☷ </> ⌨ **Services Sara can provide:** * website development * menu template * 2-page * 3-page * first page is cover * first page includes menu items * business card design</pre>	 Preview Services Sara can provide: • website development • menu template ◦ 2-page ◦ 3-page ▪ first page is cover ▪ first page includes menu items • business card design
Numbered list A number followed by a period and then a space in front of a line is formatted as a number in a list. It doesn't matter what numbers you use; Markdown displays the list with increments of 1. For each level of numbers, indent 5 spaces.	 <pre>B I 🔗 H ☰ ☷ </> ⌨ 1. Go to the app download page. 1.
