

Files, Actions, and Wiki

Access a channel's actions, files and links, and Wiki in its right panel.

Uploading files

Drag and drop a file onto the messaging section to add it to a new message and share it with other channel members. After you send the message, the file appears in the **Attachments** folder in the Files tab of the right panel as well as in the message. Other members can download it from either of these locations.

Adding actions

In the Actions tab of the right panel, schedule actions or tasks to be completed. After you create an action, you can assign it to specific users, add a due date, or add subtasks. When an action is complete, check it to remove it from your list of incomplete actions.

Note: Your [member type](#) in a channel must be full collaborator or higher to add actions.

The screenshot displays a Slack channel interface. The top bar includes a search bar labeled "Search in channel...", a notification bell, and a user profile for "David M.". The main chat area shows a message history for "Wednesday, February 10". Several messages are visible, including one from "ca M" deleting a PDF file and two from "David M." at 09:32 AM and 09:34 AM, both stating "This message is deleted". A third message from "David M." at 09:35 AM shows a screenshot of a document titled "Electronic Communication.docx". The right sidebar is open to the "Actions" tab, which features a search bar "Search actions", a "+ Add Action" button, and a "No actions" message. Below the message, it says "Add an action by clicking the 'Add Action' button or by clicking the message buttons". At the bottom of the sidebar are two buttons: "Show all actions" and "Add Action".

Editing the Wiki

Click the Wiki tab to view notes, links, and other useful information about the channel. If you see a pencil icon when you open the Wiki, you have edit access and can enter new information and enhance its appeal with [markup](#).

To save changes you make to the Wiki, click **Publish** before closing the editor.
