

# x20.1 Log In to Sync Using SSO

Note: Filecloud only supports SAML SSO. It does not support NTLM SSO.

Your Administrator may set it up so that you can enter one name and password in order to access multiple applications.

- This is called Single sign-on (SSO)
- SSO is a type of a user authentication
- SSO is available on Windows and Mac OS

FileCloud Sync

FileCloud Sync Settings

FileCloud Sync Server URL:
