

20.1 Delete Remote Network Files

By default, local files and folders deleted do not get deleted on the remote server for security.

- You can enable the FileCloud server to delete remote network files with offline access if necessary
- Your administrator needs to configure Network Folder Details to allow you select this setting

To delete Remote Network Files with offline access:

1. In the *System Tray*, right-click on the *FileCloud Drive icon*, and then select *Settings*.
2. On the *Settings* window, in the Other Settings section, click Edit.
3. Click the *Network Folders* tab.
4. Next to Remote Delete, select the checkbox.
5. Click Save.
