

# General Settings

## Summary (Status Information)

Shows information about the current Tonido Desktop service, including account name, online status, IP addresses etc.

## Updates (Check for new software versions)

Shows updates available for Tonido software and also allows you to check for any available updates.

There are two components for Tonido software updates.

- Core Service Updates
- Application Updates

If an update is available, you would first update the "Core Service" and then Tonido software will restart. After Tonido core update, you have to login and do an Application update.
