

How to Play avi on iPhone and iPad?

AVI (Audio Video Interleaved), is a multimedia container format introduced by Microsoft as part of its Video for Windows technology. AVI files can contain both audio and video data in a file container that allows synchronous audio-with-video playback. Apple iOS doesn't support .avi video files natively. One need to convert the .avi files to Apple compatible formats like mp4 and mpeg before playing it in the iPhone and iPad.

Fortunately, Tonido iOS app can stream .avi video files from PC to your iPhone and iPad. [Tonido iOS](#) app also performs live video conversion of most video formats (.mkv, .vob, .avi and others) to iPhone and iPad compatible video formats in real time. Tonido iOS app also works both in WiFi and Cell (3G, 4G and LTE) connection. In short, you can watch your avi videos from Anywhere!

How does Tonido work?

Step 1: Install the Tonido desktop app in your PC (Windows,Mac and Linux) and create an user account . Please download Tonido desktop software from [here](#). It is completely FREE.

Step 2: Install the Tonido iOS app from Apple [app store](#).
