

# How to stream MKV HD video to iPhone, iPod or iPad?

## The Problem: Playing MKV HD files in iOS device requires complex actions

With wide availability of MKV HD Media in mostly incompatible iOS formats, the task of watching those files on iOS devices such as iPhone, iPod and iPad is a time consuming and tedious task.

In order to watch the file in iOS, you should first convert it to iOS compatible format (MPEG-4 or H.264) using a separate software and then use iTunes to sync the file to the iOS device. Moreover, If your iDevice's storage is full, then you are out of luck.

## FAQ

### How Tonido iOS app is different from Air Video, Airplay It and Others?

Most iPhone and iPad video streaming apps only work within LAN. If you want to access the videos remotely, you need to open the port in your router and get a dynamic ip from a dns provider.

With Tonido you don't need to any of these steps. Tonido provides a simple URL ([yourname.tonidoid.com](http://yourname.tonidoid.com)) to access your computer from anywhere. You also don't need to muck with your router and open your router to get remote access.
