

Ubuntu Linux 32 bit

Tonido On Ubuntu 32 Bit

Requirements

- Tonido runs on Ubuntu, Xubuntu, Kubuntu 8.04 and above
- Tonido comes as a Debian package
- Tonido has not been tested on previous versions of Ubuntu
- Tonido can be installed on 64 bit versions of Ubuntu. See instructions below.

Steps

1. Download TonidoSetup_i686.deb
2. Double-Click on it and click "Install Package"
3. Start Tonido from Applications->Internet->Tonido.

Instructions via the CommandLine

```
i wget http://www.tonido.com/download.php?TonidoSetup_i686.deb
mv download.php\?TonidoSetup_i686.deb TonidoSetup_i686.deb
apt-get install fontconfig
dpkg -i TonidoSetup_i686.deb
run /usr/local/tonidostart.sh for GTK tray app
run /usr/local/tonido.sh for normal daemon app
Go to http://127.0.0.1:10001
```

For Remote Headless Configuration, [check this page](#).

Uninstalling Tonido and Deleting Account

Uninstalling Tonido has two steps in Linux.

1. Delete Tonido executables and library (typically in /usr/local/tonido folder (Tonido could also be installed in other location by the user during installation).
2. Delete all local data stored by Tonido and Profile by deleting `rm -rf ~/tonido`

There are NO user data stored in Tonido servers to delete. The Tonido account however will no longer be available for any new installation and it cannot be removed.

64 bit Systems

We recommend installing the 64 bit Linux installation on 64-bit systems. The instructions below are provided if you want to install the 32 bit version on 64 bit systems.

```
sudo apt-get install ia32-libs
```

After installation, you can either launch by running `tonido.sh` or using GTK icon tray.
To run Tonido.sh:

```
cd /usr/local/tonido
./tonido.sh start
```

If you are trying to launch Tonido with GTK tray icon support and don't have GTK IA32, then run:

```
sudo apt-get install ia32-libs-gtk
```
