Mac: "Tonido is damaged and can't be opened." message after downloading Tonido for Mac DMG

Some customers may see the following message after downloading Tonido for Mac from http://www.tonido.com/tonidodesktop_downloads/#desktop

> *Tonido is damaged and can't be opened. You should move it to Trash."*

If you see this message, please check your mac's Gatekeeper settings. Since Tonido dmg is not signed using Apple ID, Gatekeeper will not allow installation.

Workaround:

Change mac Gatekeeper option "Allow applications downloaded from" to "Anywhere". - See http://support.apple.com/kb/ht5290
